Resilient and tough, Pietra Naturale is offered with two distinct finishes—slate and flamed—each with four color choices. The slate finish resembles the natural characteristics found in authentic slate. The flamed finish exposes a more rugged texture. Both are ideal for high-traffic areas indoors and outdoors. Inspired by nature, Ferrara captures the beauty of mountain rock. Rich textures and rustic hues create bold decking designs. Ferrara adds an element of strength and serenity to every poolscape.

**Recommended Usage**
Portobello's Porcelain Stoneware products and Portobello's Ceramic Tile floor tiles are recommended for interior walls and floors and exterior walls in both residential and commercial application when proper installation methods are followed. Application requirements vary for decorative tile. D'Ampezzo and Ferrara are recommended for exterior horizontal surfaces and exterior paving. D'Ampezzo and Ferrara, while slip-resistant, are not recommended for areas where standing water can accumulate. Because of this and because of the nature of family pool areas in which large amounts of water can splash on the deck at any given moment creating momentarily the same conditions as standing water that can create a slippery condition, special care should be taken in the proper product selection. To avoid injury please consider your usage and activity level, the slope of your pool deck and your drainage system when considering these or any decking material. Please check local building codes prior to specification or installation to verify that the technical characteristics specified herein comply with all required parameters.

**Care and Maintenance**
Regular cleaning is the best way to maintain your porcelain stoneware. Use clean, hot water (combined with a neutral household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth to prevent water spots. No waxes or sealers needed. See Portobello's "How to Care for Porcelain Stoneware" brochure for more details.

**Warranty**
Please consult the Company's Terms and Conditions on Sale for important product information and complete warranty details.

**Test Results and Technical Data**
Manufactured in accordance with ANSI A 137.1 standards.
