Important Decking Product Information

Recommended Usage
Portobello’s Porcelain Stoneware products and Portobello’s Ceramic Tile floor tiles are recommended for interior walls and floors and exterior walls or both residential and commercial application when proper installation methods are followed. Application requirements vary for decorative tile. D’Ampezzo and Ferrara are recommended for exterior horizontal surfaces and exterior paving. D’Ampezzo and Ferrara while slip resistant are not recommended for areas where standing water can accumulate. Because of this and because of the nature of family pool areas in which large amounts of water can splash on the deck at any given moments creating momentarily the same conditions as standing water that can create a slippery condition, special care should be taken in the proper product selection. To avoid injury please consider your usage and activity level, the slope of your pool deck and your drainage system when considering these or any decking material. Please check local building codes prior to specification or installation to verify that the technical characteristics specified herein comply with all required parameters.

Care and Maintenance
Regular cleaning is the best way to maintain your porcelain stoneware. Use clean, hot water (combined with a neutral household cleaner for more aggressive cleaning). Rinse thoroughly and dry with a soft cloth to prevent water spots. No waxes or sealers needed. See Portobello’s “How to Care for Porcelain Stoneware” brochure for more details.

Warranty
Please consult the Company’s Terms and Conditions on Sale for important product information and complete warranty details.

Test Results and Technical Data
Manufactured in accordance with ANSI A 137.1 standards.
